management
into your work?**

Short course in Research Data Management

Dates: 3-5 May 2017

Cost: R7 400.00

Contact: Alison Davids on
lisc@uct.ac.za

Tel.: 021-6504546

Closing date for applications:
28 February 2017

Limited to 20 participants!

LISC is offering a 3-day short course to provide you with an understanding of: the importance of data management; the research data lifecycle; and the organisation, documentation and long-term curation of research data.

Funders and institutions in South Africa are encouraging the standardised management of research data.

At the end of the short course, you should be able to:

- gather and understand research data being created and assess the implications for sharing and curation
- write a data management plan
- identify appropriate metadata schemas, generate metadata and cite datasets appropriately
- identify and assess the appropriateness of data repositories for particular purposes
- appreciate discipline-specific data management challenges
- understand roles, responsibilities and governance in the RDM landscape

Participants will be required to engage in practical group work and discussions related to the content covered.

This course would be of interest to anyone who deals with research data:

- librarians
- researchers
- research assistants
- research administrators
- postgraduate students.

NQF level: 7

Entry requirement: An undergraduate degree in any discipline

Prior knowledge: Prior knowledge of the research process is required
