

# How to get indexed in Scopus ... and why: A webinar for Journal Editors

25 November 2021 at 14:00 to 15:00  
SAST

We invite you to join us for an exclusive program developed specifically for journal editors to elaborate on the selection criteria that apply for getting indexed in Scopus and the benefits thereof. The program will also touch on the specific steps needed to suggest a title as well as the ensuing process.

Presented by **Dr. Jaya Raju**, drawing from her extensive experience as a Subject Chair on the independent Content Selection Advisory Board (CSAB) for Scopus, this seminar will offer insights into the process by which journals are selected for Scopus, and why indexing matters to journal editors and authors.

....and supported by **Shareef Bhailal**, Senior Product Manager @Elsevier to shed light on the process of suggesting a title for indexing
